

Communications with your team is supported using a chat interface. Based on your experiment, you will only be able to communicate with specific people on your team. The chat channels are categorized based on the following:

- Help – use this channel to receive and send messages to the experimenter about session events and general help questions
- Business – use this channel to communicate with the Business Manager
- Ops – use this channel to communicate with an Operational Planner
- Ops Mgr – use this channel to communicate with an Operational Planner Manager
- Designer – use this channel to communicate with a Designer
- Design Mgr – use this channel to communicate with a Design Manager

You will have one or  
multiple chat channels  
you can use to  
communicate with  
your team

The experimenter will begin the design session.  
View the chat panel for incoming messages to start  
your portion of the design session.
