Communications with your bot agent is supported using a chat interface in the Designer channel.
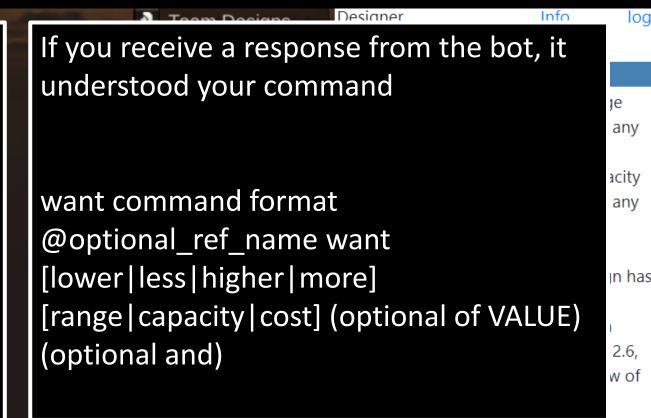

You must communicate with the bot using one of the three below formats :
- **want something**
  - Examples
    - want more range
    - @drone_1 want higher capacity
    - want less cost of 6000
    - want more range of 20 and higher capacity of 20
- **unsatisfied –** if you want the bot agent to try and resolve your preference
- **no**
- **help –** example command

If you receive a response from the bot, it understood your command

want command format
@optional_ref_name want
[lower|less|higher|more]
[range|capacity|cost] (optional of VALUE)
