Operations

135:51 **Problem Manager :** help

135:51 **Bot :** Send commands with profit, cost, customers, values, and reference plans. Some examples are

135:51 **Bot :** want higher profit

135:51 **Bot :** want lower cost of 10000

135:51 **Bot :** want higher profit and higher customers of 6

135:51 **Bot :** @ref_plan_name : want higher profit

Help

Type Here   Send

You must communicate with the bot using one of the three below formats :

- **want**

  - want more range

  - @drone_1 want higher capacity

  - want less cost of 6000

  - want more range of 20 and higher capacity of 20

- **'no'** – if you have no preference to an incoming question

- **'unsatisfied'** – if you want the bot agent to try and resolve your last command

'help' – example commands

If you receive a response from the bot, it understood your command

want format
@optional_ref_name want
[lower|less|higher|more] [range|capacity|cost]
(optional of VALUE) (optional and)

Increase size

You must communicate with the bot using one of the three below formats :

- **want**

  - want more profit of 4000

  - @plan_1 want less cost

  - want more customers

  - want more profit and higher customers

  - want higher profit north east

  - want lower cost south

- **'no'** – if you have no preference to an incoming question

- **'unsatisfied'** – if you want the bot agent to try and resolve your last command

'help' – example commands

If you receive a response from the bot, it understood your command

---

want command format
@optional_ref_name want
[lower|less|higher|more] [profit|cost|customers]
(optional of VALUE) (option
north|east|south|west) (optional and)

n has

2.6,
capacity=7, cost = 2161. Let me know of any feedback.

Help

Type Here   Send

A wizard has been added to support your communication to the bot

Select the orange bar near the chat window and it will open the wizard

Construct your message, where all numbers and design/plan references will need to be manually entered without the [] symbols

Then, hit Send or Enter to submit your message to the bot.
